Career Experience

Mr Katanga is a seasoned exploration geologist with several discoveries under his belt, including the tier one Lofdal HREE project where he participated in the discovery and remained a key field geologist on the project to pre-feasibility stage. In time, he co-founded Rare Metals Explorers cc, a consultancy that oversaw the field exploration affairs of the Lofdal project from 2014 to Q3 of 2017. He teamed up with Gecko exploration in 2017 as a senior exploration geologist conjugated to supervise the resource definition drilling for Celsius Resources, an ASX listed company, before moving to Shali Group Holdings until July 2021. Mr Katanga joined the QKR Navachab Gold mine to conduct a successful underground mining feasibility study as one of the two principal geologists directing ore drives, overall supervision of grade control drilling, wall, face and structural mapping. The fall of 2021 would see him assume an overall responsibility to supervise a resource drilling at Andrada Mining on the company's flagship V1V2 target for Tantalum, Tin and Lithium. He has been involved on many other successful projects over the years. Mr Katanga currently offers his services to Askari Metals Limited as a consultant where he has recently concluded a successful trenching programme of LCT pegmatites and acts as a representative for the Apollo Group (NGX) in country (Namibia).

He has trained several junior geologists and geotechnicians who have established good rapport with their respective employers.

Values

BGS is underpinned by three beneficial values that aim to enhance good work ethics to ensure positive change is achieved via solid loyalty, integrity and commitment- whose beneficiaries are our team members, clients and communities we operate in.

HRD | Human Resource Development

Human resource development is highly encouraged for there is no great reward in idleness but through hard work, dedication and constant improvements. Worry not for we consider your circumstance with fellow feeling. Therefore, we urge our partners personal advancement to be driven at all times by honour, respect and dependability. The good condition of heart and happiness of our people is very dear to us.

Hard Work and Excellence

Hard work pays as the saying goes but excellence is even higher principle for it reminds us to strive for greatness to surpass the expectations of our clients, guaranteeing superior service delivery. BGS bares in mind professional development, enhancements of capabilities by being creative in our approaches to challenging circumstances. Change is in effect brought by adaptability to ever changing circumstances in the mineral world.

Dependability

Dependability is a moral principle we strongly live by and guide our actions. It helps us deliver quality work and take pride in being accountable for what we do which result in a motivated and ever enduring team. We shift no blame on no one when pitfalls manifests in the course of the programme but rather stay oriented to fine tuning our oversight to ensure a well-polished and top-notch service provision.
